## PROJECTS

**ENHANCED CLOUD STORAGE SECURITY THROUGH HYBRID CLOUD AUDITING AND SECURED DATA DEDUPLICATION**  
(2022 - 2023)

Hybrid cloud auditing improves cloud storage security, allowing comprehensive monitoring and control of data access, while secured data deduplication reduces storage requirements and enhances confidentiality by eliminating duplicate data copies.

**PROPERTY MANAGEMENT SYSTEM**  
(2020 - 2021)

The system helps users easily manage and keep track of multiple properties. It stores important details like rent payments, property maintenance schedules, tenant information, and expenses. This makes it easier to organize everything and run the properties smoothly.
